## FOREWORD

---

Inaugurated in November 1991, ECARE started as a joint initiative of the Institut d'Etudes Européennes (IEE) at the Université libre de Bruxelles (ULB), and of the Centre for Economic Policy Research (CEPR), a network of around 500 researchers in Europe.

In the Fall of 1997, ECARE then merged with SOCO faculty's Centre d'Economie Mathématique et d'Econométrie (CEME), which had been founded at ULB in the 1970's, with the purpose to foster international quantitative research in economics at ULB.

The collaboration with statisticians from ULB's Institut de Statistique et de Recherche Opérationnelle (ISRO) was officialized in 1999 by the transformation of ECARE into ECARES, the "European Centre for Advanced Research in Economics and Statistics", and in 2006, by the integration of the Institute for Research in Statistics. These institutional changes have thus gone in the same direction: strengthening the connection between research in economics, econometrics and statistics while keeping our commitment to excellence and internationalization.

Over the years, ECARES researchers have developed expertise in a number of major fields of economics, in particular:

- The evaluation of European integration policies and its dynamics of "deepening" and "widening".
- The structure and behavior of banking and financial markets.
- The theory and empirics of macroeconomics, including its political economy component.
- The behavior and organization of firms and markets.
- The theory and applications of econometrics.
- The statistical analysis of time series data.
- The development of nonparametric and robust statistical methods.

This research activity has given ECARES international visibility and reputation: the *European Wall Street Journal* in September 2004 was mentioning ECARES in a short list of seven European centres of excellence that were resisting the brain drain to the more attractive US universities. Its members are also particularly active in CEPR, as Research Director, Programme Directors, Research Fellows or Research Affiliates. Members of ECARES have moreover been serving on the Council and as President of the European Economic Association (EEA), the Council of the Econometric Society and as member of the European Research Council (ERC). They have organized major international events, such as a Nobel Symposium, two annual meetings of the EEA, and a World Congress of the Econometric Society. Fellows of ECARES are members of the Académie Royale de Belgique and one is Foreign Honorary Member of the American Academy of Sciences.

In close connection with this research, ECARES has developed an important doctoral activity, with the creation of a Doctoral School that attracts many first-class European and non-European students. ECARES has also received a substantial number of EU-financed "Training and Mobility of Researchers" grants, participates in several networks in the "Research Training Network" programme, and two of our fellows have received ERC Starting Grants.

ECARES and CORE have decided to join forces in a common center of excellence, ECORE that integrates the research activities and doctoral programs of both institutions. According to Repec, ECORE ranks among the top ten research institutions in Europe. ECORE has 60 permanent Faculty, some 20 post-doctoral students and 90 doctoral students in residence in Brussels and Louvain-la-Neuve.

This report presents the achievements of ECARES for the year 2012.

They were made possible by our collaboration with CEPR and the support of our faculty (Solvay Brussels School of Economics and Management) and ULB. Our goal for future years is to keep our commitment to excellence in research as well as our mission of high-quality graduate education.

## THE DOCTORAL SCHOOL

---

The ECARES Doctoral School offers internationally competitive, high quality PhD programs in "Economics and Statistics" and in "Quantitative Economics". The outstanding quality of the ECARES Doctoral School has been also confirmed by recent studies on the quality of doctoral schools in economics. One of them is based on the success of the graduates on the academic job market. It finds that the ECARES Doctoral School is among the top ten in Europe and the third best in Continental Europe. The other one is based on the scientific achievements of the graduates. It shows that one of our graduates, Domenico Giannone, is among the top 65 of young researchers worldwide who graduated less than 15 years ago.

The first two years of the PhD programs consist mainly of course work. During the first year the students follow courses in macroeconomics, microeconomics, econometrics, and statistics. In the second year students do field courses and write a first scientific paper and attend the research seminars. These first two years constitute the Master programs in "Quantitative Economics" and in "Economics and Statistics", respectively. After completing successfully the second year a master is granted.

Depending on the performance during the first two years, students are allowed to the thesis writing phase (doctorat) of the PhD programs. During this phase, the students work on the essays of their PhD-thesis under the supervision of an ECARES member (co-supervision with professors from other universities are welcome). Typically, the thesis writing phase will take another two to three years. During the thesis writing phase the PhD students present their research in the internal and external seminars, participate in workshops and conferences, attend summer and winter schools, follow advanced field courses, etc. They are also most welcome to take their own initiatives and create, e.g. reading groups or short topical courses.

Students that have already finished another master program (of 120 ECTS) that contained courses equivalent to those that we offer may apply directly to the Doctoral Training (Formation Doctorale).

The doctoral training consists of one year coursework prior to the thesis writing phase. Its content is determined on a case-to-case basis.

ECARES is part of the European Doctoral Program network ENTER. This network allows the students to do part of their PhD at one of our partner universities (University College London, Universitat Mannheim, Tilburg University, Universidad Carlos III de Madrid, Université Toulouse 1 Sciences Sociales, Universidad Autonoma de Barcelona, Stockholm School of Economics and Stockholm University). Students may participate in the ENTER network during the Master and/or during the thesis writing phase. In the former, students have to spend the entire second year in one of the partner universities. In the later, students have to spend at least 6 months at one of the other universities of the network. For more information visit the ENTER website.

The Doctoral School also organizes several seminar series. There are four weekly seminars (economics, econometrics and statistics, pure statistics, and internal), one monthly seminar on the economics of art and culture, and four quarterly seminar joint with CORE, KULeuven and the National Bank of Belgium. Furthermore, ECARES and CORE from the UCL in Louvain-la-neuve organize together the ECORE seminar.

### **ECARES @ 20**

Organized by **ECARES** on May 18-19, 2012. It celebrated the 20<sup>th</sup> anniversary of the creation of our research centre ECARES. Link : [www.ecares.org](http://www.ecares.org)

The first day was the opportunity for some of the founders of the research center to go back in history and point out some of the factors that made the center achieves almost immediately European and international recognition.

Two panels were also organized. During the panel "ECARES and Policy in Europe", panelists highlighted the specificities of the European research environment and the challenges that it must confront given the organization and goals of the university system.

The other panel "ECARES and Policy in Europe" was the opportunity to analyze the role of academics in the policy area, either indirectly through their work or directly when they occupy executive positions, like chief economists of large institutions.

The second day of the conference was the opportunity for he fellows as well as some of the associated fellows to give an overview of the research agendas currently under development at ECARES.

### **44ème JOURNÉES DE STATISTIQUES**

Organized by **Catherine Dehon**, **Jean-Jacques Droesbeke** and **Catherine Vermandele** and the Société française de Statistique, held on May 21-25, 2012.

Link : <http://jds2012.ulb.ac.be/index.php>

Organized every year since 1970 under the aegis of the Société Française de Statistique (SFdS – French Society of Statistics), the Journées de Statistique/Statistics Days represent the most important scientific event of the French-speaking world of statistics.

They generally gather 400-500 researchers, professors and practitioners.

Since their creation, the *Journées de Statistique/Statistics Days* have mainly been organized in France (Marseille 2010, Bordeaux 2009, etc.), but also in Canada (Ottawa 2008, Québec 1996), in Morrocco (Fès 2000), in Switzerland (Neuchâtel 1994, Lausanne 1987), and in Tunisia (Tunis 2011). Belgium has already hosted the event three times, with the support of the Belgian Statistical Society (Brussels 1982 and 1992, Brussels and Louvain-la-Neuve 2002) and is getting ready to host the event again in 2012.
